

LogLogic® Open Log Management

LogLogic® MX for Mid-Size Companies

Driven by compliance, security, and limited personnel and budget, CIOs and IT departments are turning to the LogLogic Open Log Management solution as a best practice and integral part of their IT strategy. Today's log management challenge is simple, but clear—collect, secure, store and extract actionable intelligence from log and audit data in real-time.

The LogLogic® MX solution is designed specifically for the mid-market, delivering comprehensive assurance for log data compliance mandates. With ease of installation, configuration, and operation, LogLogic MX appliances deliver a solution without compromising the functionality and features that have made LogLogic the log management leader among the Fortune 500.

Each LogLogic MX appliance includes a LogLogic® Compliance and Control Suite with more than 100 customizable alerts and reports covering identity and access management, user activity, change, security, business continuity and IT performance. The software platform on this single form factor appliance also incorporates one-year on-board log archival and storage capabilities, as well as indexed log data for fast Google-like search. In addition, each appliance includes one year of LogLogic maintenance and support.

LogLogic MX appliances integrate with the LogLogic Compliance Suite to cater to specific mid-market business requirements:

- **PCI Edition:** Designed for retailers handling credit card transactions to comply with the PCI Data Security Standard and to safeguard credit card holder information.
- **HIPAA Edition:** Designed for regional hospitals and healthcare organizations to comply with the Health Insurance Portability and Accountability Act (HIPAA).
- **SOX Edition:** Designed for mid-size organizations and financial institutions required to comply with the Sarbanes-Oxley (SOX) Act specifically or using the COBIT 4.1 IT best practices and controls framework.
- **ITIL Edition:** Designed to help mid-size organizations accelerate IT problem resolution through search and drill-down reporting and by leveraging ITIL's IT Services best practices.
- **FISMA Edition:** Designed for smaller government agencies and departments to comply with FISMA regulation.

LogLogic MX mid-market appliances deliver

- Built-in, in-depth compliance content
- Ease of installation and auto-log source identification
- Ease of use and straightforward, customizable reporting templates
- Rapid “Google-like” log search
- Up to one year* of on-board raw log data archival

Enterprise-Grade Functionality for the Mid-Market

LogLogic MX mid-market appliances offer most of the same robust functionality that more than 1,000 global customers rely on to drive, meet or exceed their compliance, security and information protection initiatives. This mid-market, enterprise-grade functionality includes:

- Reporting, search, and collection performance—the ability to process custom log sources and easily customize reports previously reserved for enterprise customers.
- Chain of custody features for built-in raw log archives—enterprise-grade log data archival protection through checksum management.
- Open web-services API and after-market applications—custom portal development and business process automation through a fully featured SOA and web services API.
- High-availability features for hardware and software—includes fully redundant components and backup and restore functionality.

Product Specifications

- Up to 2048 log sources per appliance
- Up to 128 alerting rules
- Up to 1 year raw log retention
- Up to 90 days real-time report retention
- Up to 2 years summary report retention
- Up to **5000** MPS
- Up to 128 forwarding rules
- Up to 12:1 compression

Other Features

System Management

- Web-based GUI
- Command Line Interface
- SNMP support

Operating environment

- Hardened and optimized Linux OS
