

Mirapoint Orca Seawolf™

THE SIMPLE, ALL-IN-ONE, APPLIANCE-BASED SOLUTION FOR THE SMALL BUSINESS — PROVIDING QUICK ACCESS TO LONG-TERM EMAIL, REDUCED EMAIL SERVER AND MAILBOX COSTS, AND LOWER LEGAL AND COMPLIANCE RISK.

PRODUCT DATA SHEET

- Installs in minutes
- Archives all email or selected mailboxes
- Active de-duplication of emails and attachments
- Powerful search capabilities with full indexing of all common attachment types (MS Office including .docx, PDF, zip, and text files)
- Web-based, Outlook, Notes, and Groupwise search interfaces provide intuitive, easy-to-use, and secure user experience for maximum productivity
- Open interfaces (including POP, IMAP, SMTP) to the email server provide open access to all major email servers (Exchange, Domino, Groupwise)
- Email import and export of Outlook .PST files
- Offloads all email data and searching to a purpose-built appliance enhancing email system performance and user productivity
- Simple and secure appliance makes email archival a straight-forward "set and forget" process
- All hardware, software, storage, and tape drive integrated into a small desktop form-factor for security and reliability with minimal administration
- WORM tape drive with AES256 encryption support compliance and legal needs
- Audit Logs
- Full international character support

Are You Managing Your Email or Is It Managing You?

As email traffic explodes, all organizations faced with mounting business challenges:

- Users spend up to 30% of their time managing email and their inboxes, while requesting yet more mailbox space as email server costs explode
- Outlook .PST archive files are costly to backup and search
- Employee turnover loses crucial business information
- Restoring servers to retrieve accidentally deleted emails wastes time and money
- IT costs have to be controlled, while maintaining email functionality and service
- E-discovery requests cause expensive email restores, audits, and reviews
- Demonstrating compliance with retention policies or regulations is expensive

On top of all this, organizations often faces a difficult choice of cutting corners on IT infrastructure or wasting money on unused technology.

The Mirapoint Orca Seawolf Appliance

Email archiving can reduce costs and risk in many areas and does not need to be a complicated IT project and ongoing cost center. Mirapoint makes email archiving simple and cost-effective with the Orca Seawolf appliance, which includes all software, server hardware and storage in one easy-to-deploy desktop system, including:

- Native client and full server support for: Outlook/Exchange, Notes/Domino, and Groupwise
- Email server optimization by offloading storage and search to a purpose-built appliance
- Information continuity to manage employee turnover, email server migrations, and unavailability in a smooth manner without data loss
- Powerful, advanced search tools that reduce the time and costs of compliance, discovery, and audit requests

The Orca Seawolf operates in a low-risk, passive mode and archives all emails, while ensuring minimal impact on your email infrastructure. All emails sent to or received from the email server are archived using open, standard protocols (POP, IMAP, SMTP). Administrators can set granular policies to selectively archive only relevant messages by department, sender/receiver, or

Mirapoint Orca Seawolf™

All message headers, content, and attachments are fully indexed and deduplicated. Advanced search can find messages based on sender, recipient, subject, keyword and date range, but also word proximity and fuzzy logic. To adhere fully to security policies, the archive is not modifiable with all actions recorded in a secure audit log.

The Orca Seawolf's legal hold feature helps comply with court requests and legal actions, while native email client integration ensures that users are highly productive in mining email for business critical information. With granular permissions and Active Directory integration, end users can restore accidentally-deleted emails instead of hoping that email backups exist and can be found. Email comments and tags are a Mirapoint innovation that helps workflow and case management when responding to e-discovery motions.

The Orca Seawolf also mitigates the increasing costs of email servers, helps implement IT controls to comply with data retention and records access policies, responds efficiently to e-discovery and audit requests, and reduces the total cost of ownership for the email messaging infrastructure.

Benefits

All-in-One Solution

All hardware, software, and storage comes in a single, affordable appliance that delivers simplicity, reliability, and all functionality for email server and user mailbox management, e-discovery, and compliance.

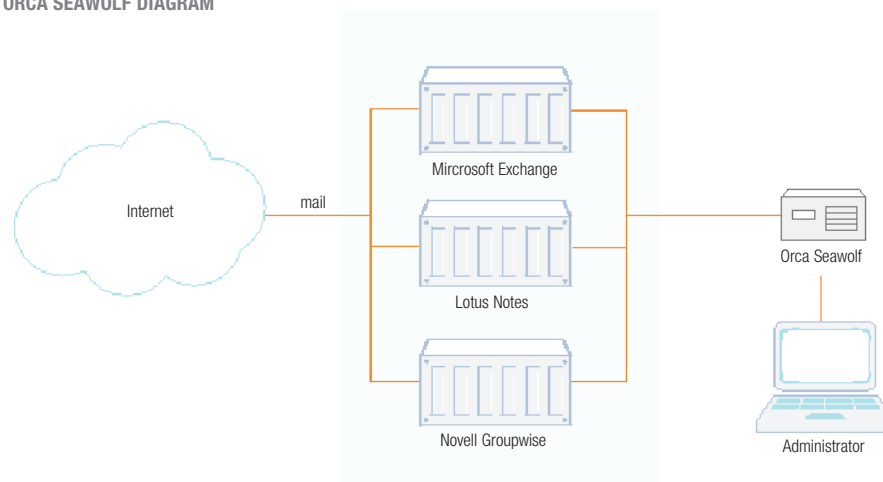

Email System Management

Reduce the size of your email server store, increase its performance, and eliminate the need for individual mailbox backups. At the same time, free up IT resources by providing easy retrieval of lost email with a secure and simple appliance. Archive email real-time in a tamper-proof manner on WORM tape, without losing emails again.

Regulatory Compliance and Corporate Governance

Comply with industry and government regulations related to email retention and respond safely and efficiently to legal discovery and public records requests using features such as high-speed fuzzy-logic searches, legal holds, and message export. All email is kept tamper-proof and all actions are recorded in a secure audit log.

MIRAPOINT ORCA SEAWOLF DIAGRAM

SPECIFICATIONS	ORCA SEAWOLF
Processor	Dual Core Intel Xeon™ Processor
Memory	2 GB ECC DDR RAM
Networking	1 Gb/s Ethernet
Storage Capacity	500 GB
Tape	Integrated Sony AIT Turbo 2 Tape Drive
Form Factor	Desktop
Regulations	RoHS, FCC Class A, UL, BSMI, VCCI
Messaging Platforms	Microsoft Exchange, IBM/Lotus, Novell Groupwise, SMTP/POP3/IMAP
WARRANTY	Hardware: 1 year warranty Software: 90 day warranty includes email only support and updates Support: Annual contracts offered for 9x5 or 24x7
