Optimal performance and continuity for your critical business applications.

The EP60 reduces IP congestion between contending applications by intelligently shaping and prioritising traffic. It monitors in excess of 3000 concurrent IP flows, reorganising and reprioritising IP traffic as it does so in line with a customisable rule set. By doing this, the EP60 ensures that the business applications you deem critical enjoy optimal performance and continuity.

The deployment of Exbander Precision solutions improves the throughput of applications organisations rely on daily – including file sharing, email, backup, SSL and document management, as well as ERP and CRM solutions.

Application performance across the network can be improved by 5 to 50 times and in some cases up to 100 times, and simultaneously WAN bandwidth utilisation reduced by 65 to 99%. These dramatic results allow businesses to take advantage of their networks, infrastructure, and applications in ways that they had never imagined possible.

- » **Real Time Traffic Analysis**
- » **Connects directly to the internet at speeds of up to 4Mbps**
- » **Controls and manages Internet/WAN connections to reduce IP traffic congestion, eradicate bottlenecks and maximise availability**
- » **Completely configurable to prioritise application traffic in line with what you deem critical**
- » **Ensures optimal performance and continuity for a wide range of business applications**
- » **Integrated Firewall to protect your computer systems and network from abuse**
- » **10,000:1 data transfer acceleration rate (via optional upgrade module)**

Works straight out of the box.

The EP60 is really easy to set up – in fact it's designed to be installed and working within just a couple of minutes.

What's more, the user-friendly Precision Start management software included with every Exbander Precision appliance makes it really straightforward to customise the way in which your EP device works.

And the result? It meets your data throughput needs exactly.

Product Sheet
Specification – EP60
SHAPING

Shaping Rate – Total Throughput (in & out)	4Mbps
Shaping Circuits (Switches)	1
IP Flows	3072
Maximum Static Partitions	128
Maximum Dynamic Partitions per Switch	128
Maximum IP Hosts	24

CONFIGURATION

Precision Start UI	Yes
Command Line	Yes
SNMP	Yes

HARDWARE SPECIFICATION – EP60

Power	Dual 110-240 Volt Auto Switching (external)
Operating Environment	Temperature: 0 to 45°C (32 to 113°F) Humidity: 5% to 95% RH
Certifications	FCC, UL, CE
Dimensions	214mm (W) x 150mm (D) x 30mm (H) 8.43" (W) x 5.91" (D) x 1.81" (H)
Weight	5.2Kgs net
LCD Panel	3.5"HDD & Compact Flash DOM
LAN bypass on LAN/WAN ports	-
Serial Port	One RS-323 DB9 (for system console)

Ordering Information

PRODUCT NAME	DESCRIPTION	PARTCODE
EP60 Device	EP60 Device including Software License and 25 users	EP60
Silver Support EP60	12 months Silver Support Package for EP60	SISUP-4-EP60
Gold Support EP60	12 months Gold Support Package for EP60	GOSUP-4-EP60
IMView	IMView for the EP60	IMV60
EHS60	Easy Hot Spot Module	EHS60
User 100	100 User Licence for the EP60	USER100
WAN Acceleration	WAN Acceleration Module	WAC60
